FOR HEALTHY
DEVELOPMENT**

Provides a “quiet hour” for premature babies in the NICU

- Helps meet American Academy of Pediatrics guidelines for safe noise levels in the NICU¹
- Reduces sound levels by at least 7 decibels (dB)¹
- Results in a reduction of sound pressure level of more than 50%¹

Ideal during special patient care procedures & transport

- Protects the sensitive ears of babies under ventilation
- Decreases the MRI noise levels when used in conjunction with earplugs¹
- Reduces disruptive noise associated with transfer of infants to different hospital units & provides quieter environment during transport in emergency vehicles

Safe & Comfortable

- Fits comfortably around the baby’s ears with a soft foam oval-shaped design and gentle hydrogel adhesive
- Meets infection control standards through single-patient use design
